of the bill for the admission of Washington territory. It is Senator Dolph's bill as repirted with amendments by Senator Platt of connectic cu. The latter senator, who is charman of the sub-committee on territories, twice when the bill was referred, mode the opening speech on Tues car. He said the scriptural injunction "knock and it shall be opened unto you" remains yet unfulfilled, netwithstanding the fact that the territory has for more than eight years heen knocking for admission into the Union. He traced the history of the various measures that had been introduced in congress since 1877 looking to conterring statehood on the territory; and then taking up the annexation clause, said that it corresponds geographically to the bill recently assed by the house of representatives to annex to washington a portion of date territory. The speaker had seen the petitions that had lately see beat here from Idabo praying for annexation to Montana, but he could not believe this dear for annexation on the east was generally, there is a small tawn on both these it therefore stands out prominently and causes in amy entrange them and easter and eathlike quickess thus the conditions in the early look, being built for a Mr Philips the date of all the early look, being built for a Mr Philips and excluding the garret, it is four storing in the early look, being built for a Mr Philips (as was Mr Philips and the value of the stands and the prolifer and the value of the stands and the full time and the value of the stands and the full time at Yeal and the value of the value

The senator remarked that from some quarteit had been suggested that New England was opposed to the policy of admitting more states, masumed as her representation in the senate is only twelve members, and that soon she will be literally overpowered by numbers. It was re-plied that such a thought was unworthy of sat-cus consideration. He then added "Why should New England be thought to fear or relengthened lines have builded cities, developed agriculture, penetrated the deep recesses of the earth, created a highway, yes, highways for the nation, established the institutions of education air religion, elevated and glorified mankind who are they. Movement in the United States

An Exhibition of the Handiwork of Young Children - A Chat with Mrs James Brown Potts -Special Correspondence of The Sunday Orogonian

New York, Actif 1—The present labor movement in the latted blaces is not only for more formidable than anything else if the kind ever yet seen anywhere, but it has certain and everyet seen anywhere, but it has certain reatures, other than striking and loyer ting, which give it especial interest to every observer of popular upbeskuls. The habitof "striking," which is confined mainly to countries that enjoy political freed in, has played a great part in Fuglish industry during the past seventy years of the evolution of machinery, and in this country we have for over thirty years had a strikes of the past bave generally been local, without any extensive connection. They have been confined to akingle trade at a time, destitute of any idillation with the great body of trades, and Unit demands have been narrow. con-equently easily handled

consequently easily handled. The present ithor movement differs freely all its predecessors in several respects. In the first place, it is as wide as the country are compasses the whole hady of wage-workers. In the second place, it is under a gigantic system and combination such as his never before been man-dested. A bundled industries are allilined in the single society of the knights of Labor, which surbraces hundreds of thousands of mem when subtraces indicates a thought far beyond what is represented by its membership and there are other national federations, less imposing, which tet exercise a power known only to those who watch their operations. This extraordinary deelopment of what the French call solid unity is a feature of the utmost consequence purpose and method among these nurs argan need masses, so far as their mail ends are con-cerned "which nobody can deny" who takes the trouble to go under the surface. In the fourth place, there is a practice of "motual help," which is altogether novel among the la-horing classes. In the fifth place, there is a many-lous babit of obscience to orders, the man-ficial too of which in recent three beautiful. k stations of which in recent times have sur-prised all observers. In the sixth place, the deprised all observers. In the sixth place, the deniands under are vasily more comprehensive than those which formerly came from wage workers, as may be seen by a comparison of any of the present platforms of labor with those of other times.

These things give to the labor movement of to day its massiveness, momentum and so lidity. The new forces which enter into it are offset by the new forces on the other side, movined in a ordern machinery, and in the modern combinations of capital, which are as revolutionary as those of labor.

A great amount of prospecting has been and is being done in Jackson county, and 830 toca-tions have been filed upon quartz claims within six months. The most activity has been displayed in the bills about Jacksonville, where the played in the bills about Jacksonville, where the mining little est has its hendquarters. Every outer pping of quartz has been located upon, and notices setting forth claims to quartz are visible on every hillede and in every canyon. It seems as if the larger portion of Jacksonville's population must have entered upon the business of filing claims. Everyledy ewas at least one claim, and particularly impecunious individuals have more. I judge that at least fifty claims are being worked, the most of them constantly. Those on which the most work is being expended he upon the creek above Jacksonville, and particularly upon the right hand fork, from we to four miles from town. Some of them have been worked in past, jears. The principal mines in the neighborhood are the Holman, the lavet port, the Bowden the Johnson & Elder, to N w Edorado or Brown lead, the Grob & France the Stellens of the Bellion, was worked some fifteen pears since by Charles Dri w and Sim Bowden, who stoped out a quantity of rock amounting probably to several lundred tons, and crust of it in a ten-stamp mili, which they built near by, upon the right hand hith. It can be inseed from the creek to a vertical height of, ear self-feet. Considerable work was done to in it in 18st and therefore, and in rich defections was worked, yielding a large sum, varituely stated at \$5000. \$13,000 and \$25,000—the reder can take his choice. It is a tradition that the lucky finders drank no cheaper drink than champagne while engaged upon this lead. Three tunnets have been run in the velo, all close together and down close to the creek. The claim has been re-located by Meesrs. The Allantic Monthly for April opens with a paper on Gouverneur Morris by Henry Cabot Lodge, which will be found of much interest. A short story by Sarah Orne Jewett, entitled "The Dulham Ladles," is also a pleasant feature of the number, and with Mr. James' and Miss Marires's serials farulahes its fiction, Houghton, Miffilin & Co., Boston.

THE SAIR KDAY HALF-HOLIDAY.

Humane women of New York society are inereating themselves to secure for the overworked shop girls of the great metropolis a Saturday baif ho iday. Recognizing the fact that so long as Saturday afternoon was the fashiona-ble time for slopping, merchants would not be likely to close their stores for the benefit of the wear; girls, who earn the pittance that stands between them and starvation or shains, the women who mangulated this movement began by missionary work among the shoppers, and the city was thoroughly worked in the en deavor to induce women to ple ige themselves not to shop after 1 o'clock on Saturdaja. So successful was this prehumary work that fash-tonable stores do not find paring business after that hour on 'aturday, and most of the leading merchants are willing to grant the request to close if the movement is properly concerted so that all may by upon the same footing. The lending ministers of the city have each advocat-ed the movement with elequence and enthu siasm, and the newspapers have lent their aid in the same direction It will be seen that the emploies have been kept in the background Work is being done for them, but not through them. In this, woman's fact is visible. Employee are to be the beneficiaries of the movement merely, and in no sense its dictators. The singlithat is groused by any interference with business rules on the part of employee is thus completely disarrand. One of the chief movers in the present at

GOING THROUGH A CHANGE. Meeting mine host knowles, of the St Chatles, our representative was cormally invited to see the vast changes being made in this hause. The introduction of an elevator, which is restrained to be in operation on the 2-th, has been the incentive for the wholesaid changes new in progress. Ascending to the second thoor, the several nooms were shown which had received new wall paper and patitions, making them clean and inviting. This was the case on the third and on the manisard tworr, each and all rooms being similarly treated to sades having new matteresses made for the lest the house has now 180 rooms, to which the heing added some twenty over the Morrison street stores. These are now in the hunts of the currietters, plasteners and paperons, who will have them ready as son as the election operates.

Why Cannot Portland Have an Institution of this Character?

A Few Suggestions on the Spinest by Mrs G W. Chandler in a Lecture Before the Bootel Science Cinb

At the close of her paper on art, recently read before the Social Science association of this city, Mrs Chandler made a pleasing ideal eketch of what might be in this community in the way of art education, by means of public galleries and other influences. The pages containing this portion of the paper are here presented our training and descriptions and the paper are here presented to our readers, and deserve the attention of all who desire to promote the true interests of the people & Most of us believe that the uplifting of those

Most of us believe that the uplifting of those whose lives are now unlovely must have to do with the growth of a common interest in the family. This is often saily divided, the mothe, enduring her life of grim anguish, struggles as use to bring somewhat of respectability into the lives of her children, white the father is two often won away by the allierments of the tracers in drink. If places of public recreation could be opened free or for a merely mominal fee, would they not become a substitute for evicously experience. If these men could be won to where they could bring their wives and children with them, would not family hes be strengthened by mutual onjoyment in company? There are many whose daily lives are passed amiliantermals conditions, who hardly realize the they are gifted by nature for nother pleasure than the salcon or beer garden can give is a not patiful. Think how little that is worth the integer ones into their lives. The desoiation and destination is some house is heart-breaking. Ambition is gone House is dead. Faith his become blind, and no longer sees any brigh ness in the coming days. If we could inspire all these anew and relight the fires on these household altare, could we not hope to lead this werry, lear working work a little nearer the feed?

CHAPTER VII

"PARADISE ON KARIH "

Mrs Matthew Cowan was a respectable Itish lady of religious inclinations. She dwelt in an Oblo town not far from Rocky creek where the Wallace family had lived for so many years. There had been a Mr. Cowan of convivial habits but reckless expenditure. he died, however, of a fall from a window in an intoxicated moment, and rumor was quick to say that perhaps Mrs Cowan added to the momentum of his fall by a gentle wifely push—i artunately for the worthy widow he fell before a legacy came to her. The death of a rich and in England left, her with some \$20,000, besides clearing the farm of the numerous mortgages with which her husband had burdened it, indeed for the past few years almost the only harvest raised on the Cowan farm had teen loans. Freed from husbandly aunoyance, Mrs. Cowan took on an air of subannoyance, are, towan now on an arr of sub-dued cheerful melancholy and meane piety. She was foremost in all religious meetings, and was regularly converted at each revival, occup-ing a front seat with those who wished to be prayed for She was a short, thin little woman, prayed for "She was a snort, thin little woman, with little black eyes, little weatened neck, scanty black hair, and a much wrinkled face. She wore black alpacas of a seedy napect, and in the fourth year of her widowhood descended to the vanly of a bright green bow at her collar. About this time a cadaverous looking man with large, pale eyes, auburn side-whickers and hair, came to the lown-Receiville—and estabnamed a home, or a "Transise on Marth, 'he called it, and this name was painted on a board natied on the picket fance that enclosed the land and weather-worn house he had hired. The Roy Mr Green became highly popular in the community, but all the ladies at least acknowledged that his wife was queer. Finally poor, tired Mrs. Green died, and then stories cane out of abuse and neglect. Mr Green endeavored to save expense by carrying on the "Paradise" with pauper labor He never troubled the parish for burnal periods, but he did for coffus and some charitable visitors, coming one day, found vermin covered creatures tied in the garret, without food or clothing, fillic children famished for food, little, starved, dead babies in rude boxes ready for burnal—while some half-witted women told a horrible story of crime and abuse.

The result was that Mr Jonas Green was driven out of "Paradise," which name by the way—the significant of the rickety feure—cloug to the place for years as an noncal repriath.

MORF ABOUT THE FIRES.

EAST ST. LOUIS, April 10, 8:30 A. M.—The city has been in a state of panic during the entre night, owing to numerous incendiary fires, but with the presence of the military, which is guarding all the main lines of track diverging from the relay depot, something like order appears to Dremies for the day. It is not possible at this hour to more than approximate the day.

They were all confined to railroad property, and the officers sent with troops report that about twenty of thirty cars in all were destroyed, which were loaded with merchandles and coal. The greatest damage occurred at the Cairo Short Line yards, about one mile from the relay depot, where probably affreen cars were destroyed, and flames for a time threatested the destruction of the one or two hundred cars in the immediate vicinity. The yards were improducted by the presence of an active deputy or officer of any kind, and until Company D, of Champaign, arrived at the scene, the men were permitted to burn at their will. Ten railroad officials have remained bere on duty, but in the confusion and that occasioned by the fixes last night, there were refer people in authority who could even guide the troops to the scene of the furning cars. General Manager Stone, of Burlington road, remained at the scene and dispatched all the men his employ at occas, restrictly in the capacity of deputy sheriffs, to the Louisville A Nashville relight depot where forth marmed clerks were imprisoned, afraid to leave the building to encounter the angry crowd which remained in the vicinity. They found no difficulty in leaving the scene under the guidance of these armed cyclians. Both the sheriff and the mayor hold the view that the presence of solders was all that was required to restore peace on lorder. The city authority is confessed by wask and the each time of the extincer arrested a few days ago by the sheriff, when released to not work what in the fact that sense of the strikers arrested a few days ago by the sheriff, when released to the country sheriffs.

EIGHT HOUR DEMONSTRATION.

An Andience of Right Thomsand Workingmen Assembles at Chicago

(HICALO, April 19 — Fully 8000 workingmen crowded into the great armory of the Sixth cavairy on the lake front lo-night, and possibly 10,100 more gathered in front of the building The occasion had been advertised as an sighthou demonstration, under the auspices of the trades assemblies of chicago. A large proportion of the assemblage came in organized bodies, preceded by fife and drum and carrying huge transparencies. Few of the men wore any regalla, and apparently no attempt at display was made, except of point of oumbers. Neither was there anything resembling a procession Various unloss came trooping in from all directions, and first came first served was the rule as to seats within. Nevertheless, excellent order was maintained. Hats were promptly removed at the first rap of the chairman's gavel, and two or three hundred of the men's wives and sweethearts, who occupied first of seats in the place of honor, were shown marked consideration by the abandonment of pipes and cigars in their vicinity. The crowd on the outside was held legether by seeches from Richard Powers and several other prominent kinghts of Labor. Just as the overflow meeting was fully under headway there emerged from the hall in which the eighthour demonstration was being held a file of men reating a red flag with a German inscription, which had been carried into the hall during the progress of the meeting, concealed Sam Fielding, snarchist, delivered a harangue to a crowd which numbered about 1000. The speaker's negro wife sat at his feet. The crowd was composed largely of the foreign element, and the two men who bore the red flag could not speak kinglish. SENATE

Washington, April 19 — After routine business, on motion of Platte, the Washington territory admission bill was taken up Enstis a amendment having been disposed of, the question arose on an amendment offered by Morgan, requiring the constitution of the proposed state to be submitted to congress and approved by it before admission of the state. In was offered to take the place of the section of the bill which provides that the territory should be admitted to the 1 time on on proclamation of the president when the territory should have compiled with the provisions of the bill. Morgan's amendment was voted down year 14, mays 25. Mitchell, of Oregon, spoke in approve of the bill. He also advocated the speedy admission of bakota and Montana. Sanishury and it was not clear but that we might have to pay an indemnity 1 maltreatment of thisses residents of Washington territory, and he thought congress should make some provision for reserving from the fund going to the territory as proceeds of public lands an amount sufficient to cover such possible indemnit.

Edmunds said the fund referred to was the school fund. He deprecated any reduction of that fund. The territorial authorities had exercised full diagence to represe the disturbances referred to had been wiked, but they I ad not been the acts.
